

JJ Smith Heavy Duty CMS Roller Tables

Heavy duty roller tables ideally specified to fit most crosscut saws or other machines that require infeed or outfeed tables. The tables can be securely fixed to the floor and have adjustable legs to suit the required working height. The tables are constructed in 3000mm and 2000mm lengths with 400mm, Ø 60 x 2 mm Steel Rollers. All tables are fitted with a 50 mm x 50 mm back fence and there are no open gaps between the rollers. Flip stops and scaled fence can be fitted as an option. Tables are able to be connected together for longer section sizes.
