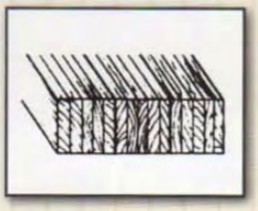
Robotically welded

Heavy Duty.....not heavy... there's a difference

Table Tops

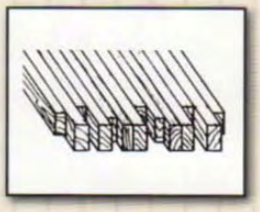
Butcher Block

Stair Treads

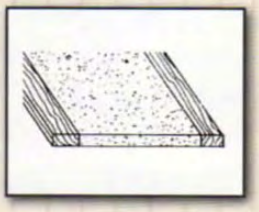


Turnings

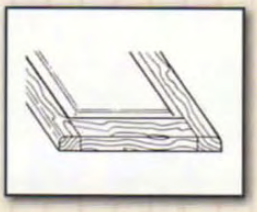
Mouldings



Hand Rail



Lumber Banding



Cabinet Doors

MADE IN USA

Glue Applicators

The Plate Spreader *provides an accurate and efficient glue spread. Works well with our Clamps to quickly apply glue to multiple boards. A perforated aluminum grid, 8" x 48", rises from the stainless steel glue container by a foot activated pedal to provide the correct amount of adhesive. Boards over 48" can be 'dipped' twice. An aluminum cover for the glue container extends glue use. Fast, convenient, easy to use and clean.*

For higher production, *we also offer a full range of Conveyorized Glue Applicators to position in front of your machine. Like all Taylor products, they are fast, convenient and easy to use.*

12 1/2' Wide 12 Section Clamp Carrier with Conveyorized Glue Applicator 13" Wide, 8' Infeed, 12' Outfeed

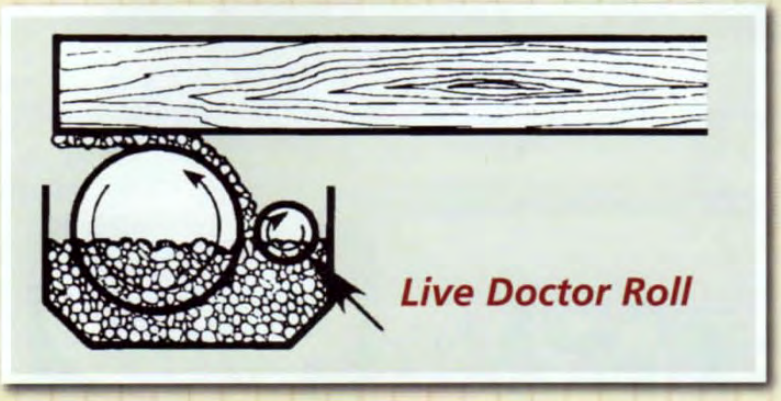
The New Taylor Roller Spreader

Stainless Steel 'Doctor Roll' for Adjustable Glue Spread

13" Removable Glue Roll

Great for Edge Gluing or 'Face' Gluing

Stainless Steel Container with Cover for Overnight Storage



Live Doctor Roll

- 13" Wide Glue Roll
- Slip Clutch for Safety
- Stainless Steel Container
- Overnight Glue Storage
- Long or Short Stock
- Optional 5' Infeed Roller

Precise and adjustable glue spread: *The Taylor Roller Spreader is equipped with a fully adjustable live doctor roll. The doctor roll spins in the opposite direction (from the glue roll) which provides a controllable even spread.*

Attaining the proper glue spread thickness is very important. Too much or too little glue spread will weaken glue joints. Also, too much glue wastes money, slows production and creates more "clean up time" for both the applicator and the Clamp Carrier.

Fast, convenient, easy to use and clean.
